

Clinical Trials and Statistics Unit Strategy 2023 - 2027

We translate cutting-edge science into quality clinical trials that can transform cancer care, by:

- ☑ Leading patient-centred trials of smarter, kinder therapies that treat cancer more precisely
 - ☑ Transforming the way we design and conduct trials with innovations in trial methodology
 - ☑ Learning as much as we can with integrated translational research and data science
 - ☑ Championing purposeful and inclusive patient and public involvement
 - ☑ Embedding research to improve the sustainability of our trials
 - ☑ Supporting interdisciplinary training to empower the next generation of trialists
-
